Motor carrier support manual

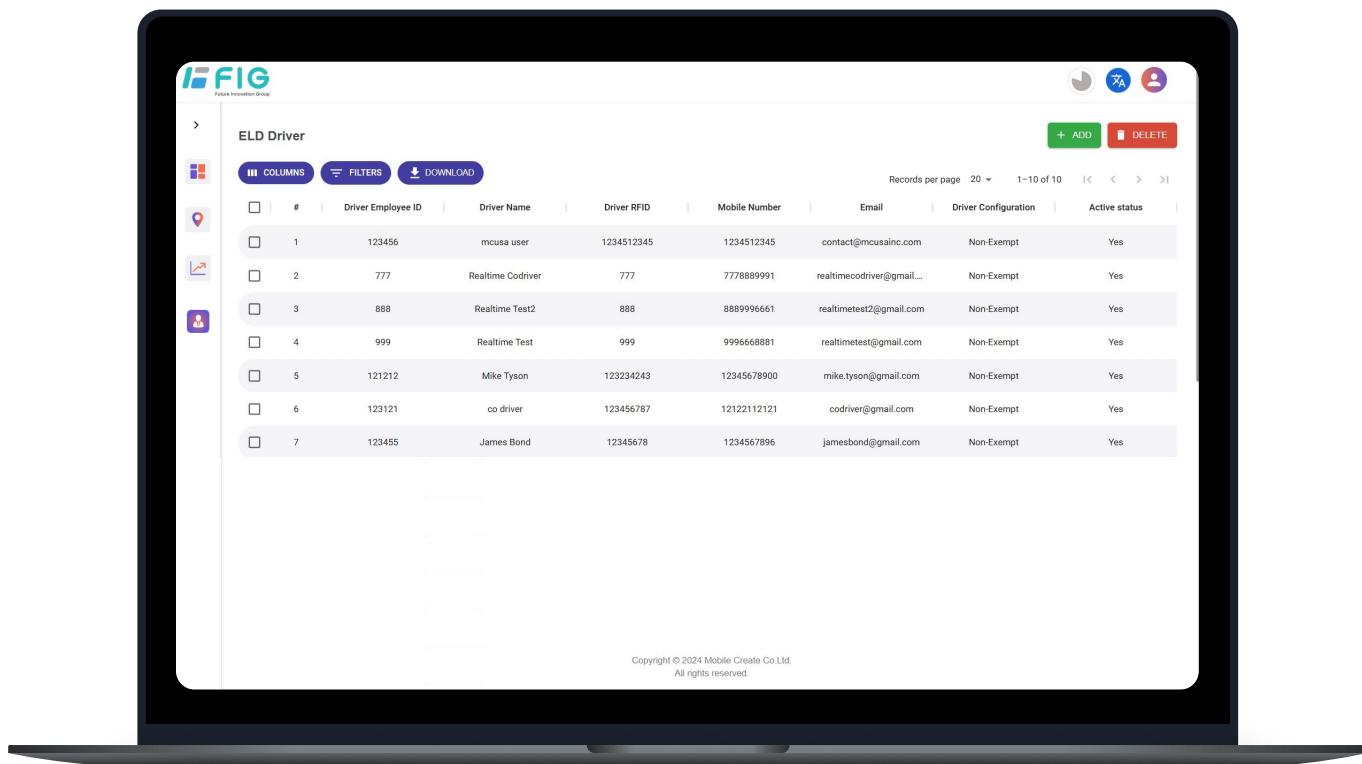

Version 1.0.0

2. Driver Management

The **Driver Management** Module allows carrier support personnel to efficiently manage driver details, including **adding**, **viewing**, **editing**, and **deleting** driver information. This module ensures streamlined operations and compliance management for the fleet.

2.1 Driver List

The Driver List Page serves as the dashboard for carrier support personnel to view and manage all drivers in the fleet.

Driver List Page

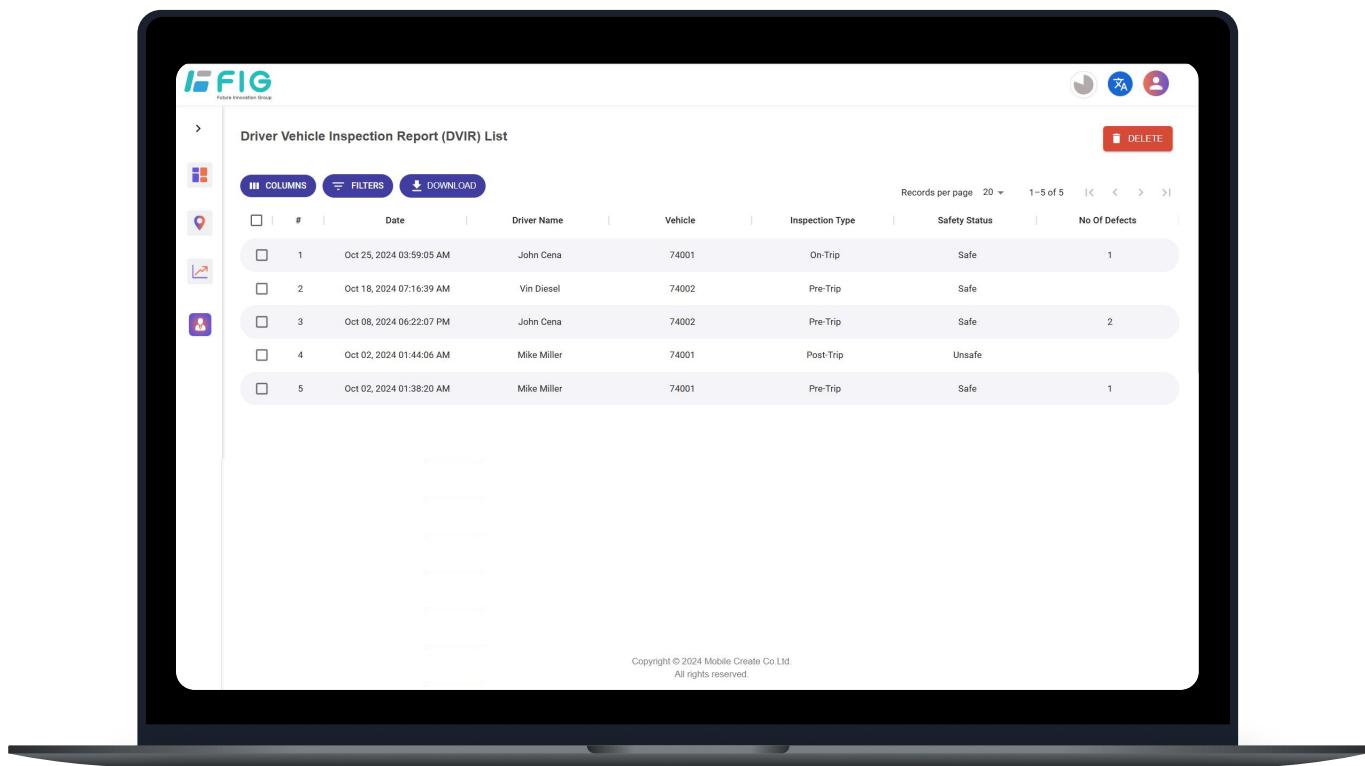

- The **Driver List Table** displays key details of drivers in the fleet in a tabular format, including the **Driver Employee ID**, **Driver Name**, **Driver RFID**, **Mobile Number**, **Email**, **Driver Configuration**, and **Active Status**. This table serves as a centralized dashboard for carrier support personnel to view, manage, and take actions on driver records
- To view any driver details click any **row in the table** to redirect to the Driver View Page, where all details of the selected driver can be **reviewed** or **edited**.

3. Driver Vehicle Inspection Report (DVIR)

The DVIR Module provides carrier support personnel with an overview of Driver Vehicle Inspection Reports (DVIR) created by fleet drivers. This functionality ensures efficient monitoring and management of vehicle inspection reports.

3.1 Driver Vehicle Inspection Report (DVIR) List

The DVIR List Page displays all submitted reports in a table format, allowing carrier support personnel to review the details at a glance.

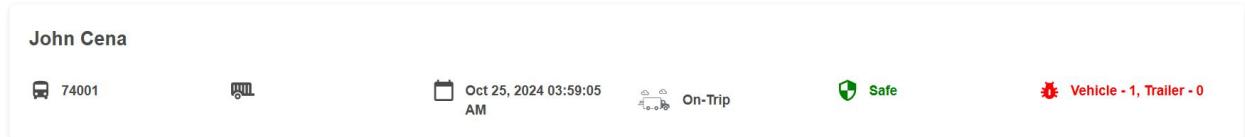

Driver Vehicle Inspection Report (DVIR) List Page

- To access the complete information for a specific report, they can click on the corresponding **row in the table**,
- which redirects them to the **DVIR Detail Page** for a detailed review.

3.2 DVIR Details Page

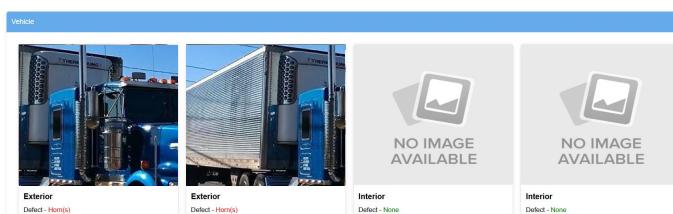

The DVIR Details Page provides carrier support personnel with a comprehensive view of a specific Driver Vehicle Inspection Report (DVIR). This page offers an organized layout for reviewing critical information, including an overview of the driver's details, vehicle details, and defect status. Additionally, it features visual aids such as defect images uploaded by the driver, enabling precise evaluation and decision-making.

- When a carrier support person clicks on a specific **row** in the **DVIR List Page**, they are redirected to the **DVIR Details Page**, where they can review all the details of the selected inspection report.
- The first card on the page provides an overview, including the **driver's name, vehicle number, date of DVIR creation, defect count** for the **vehicle** and **trailer**, and the **safety status** of the vehicle.

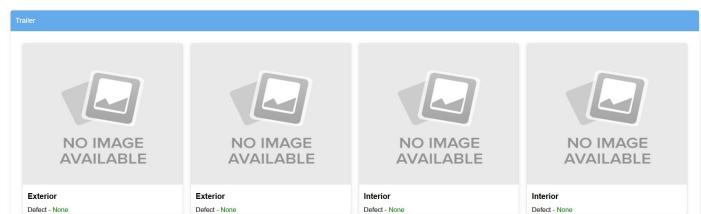

Driver And DVIR Details

- Additionally, there are two separate cards that display images of any reported defects. If the driver has uploaded images of defects for the **vehicle** or **trailer**, they will be shown here.
- This allows the carrier support personnel to visually inspect the defects and take appropriate actions for resolution.

Vehicle Defect Image Card

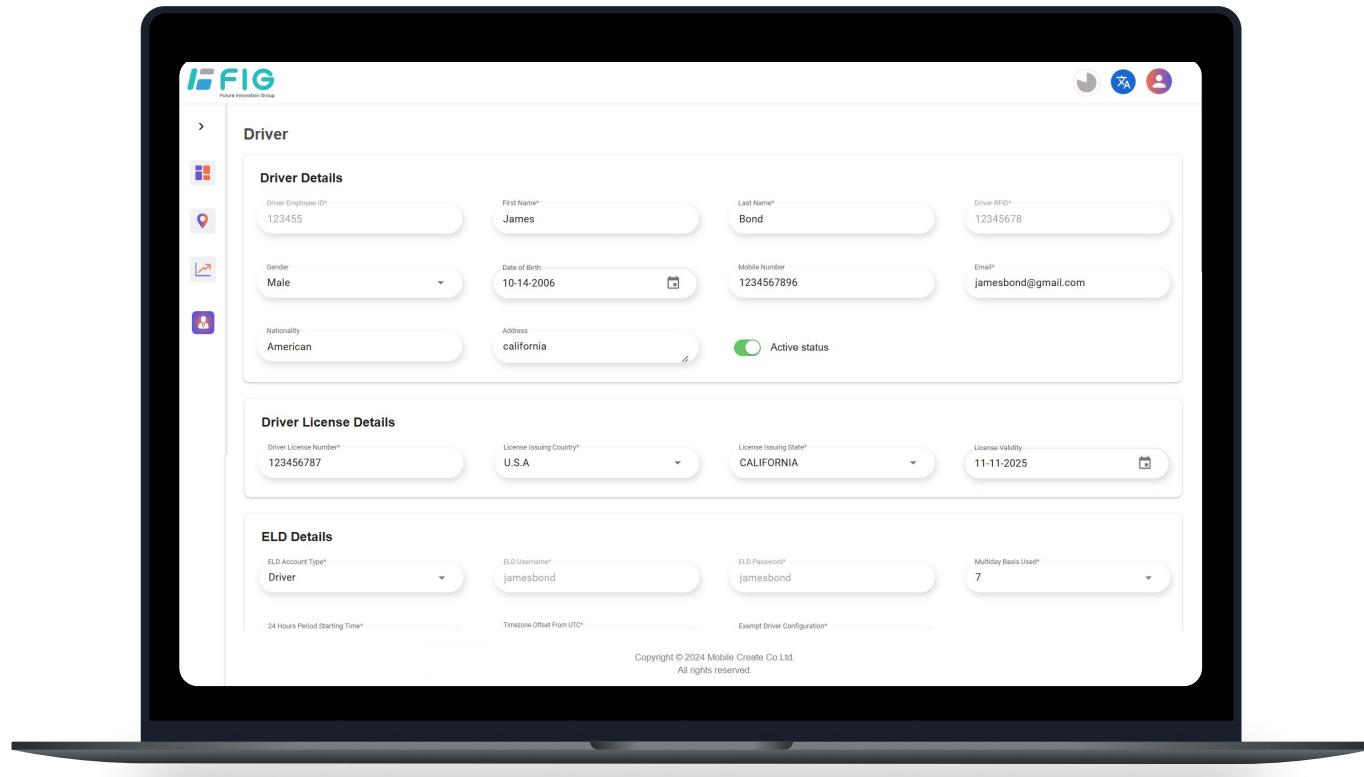

Trailer Defect Image Card

This detailed view ensures efficient handling of reported issues and maintains vehicle safety compliance.

2.2 Driver View / Edit

The Driver View Page allows carrier support personnel to see full details about a selected driver and make edits if necessary.

Driver View/Edit Page

- Driver view page organized into four sections: **Personal Details, License Details, ELD Details, and Hours of Service (HOS) Details.**
- Most information is editable, except for the **Driver Employee ID, Driver RFID, ELD Username, and ELD Password.**
- After making changes, personnel can click the Save button to update the records

SAVE

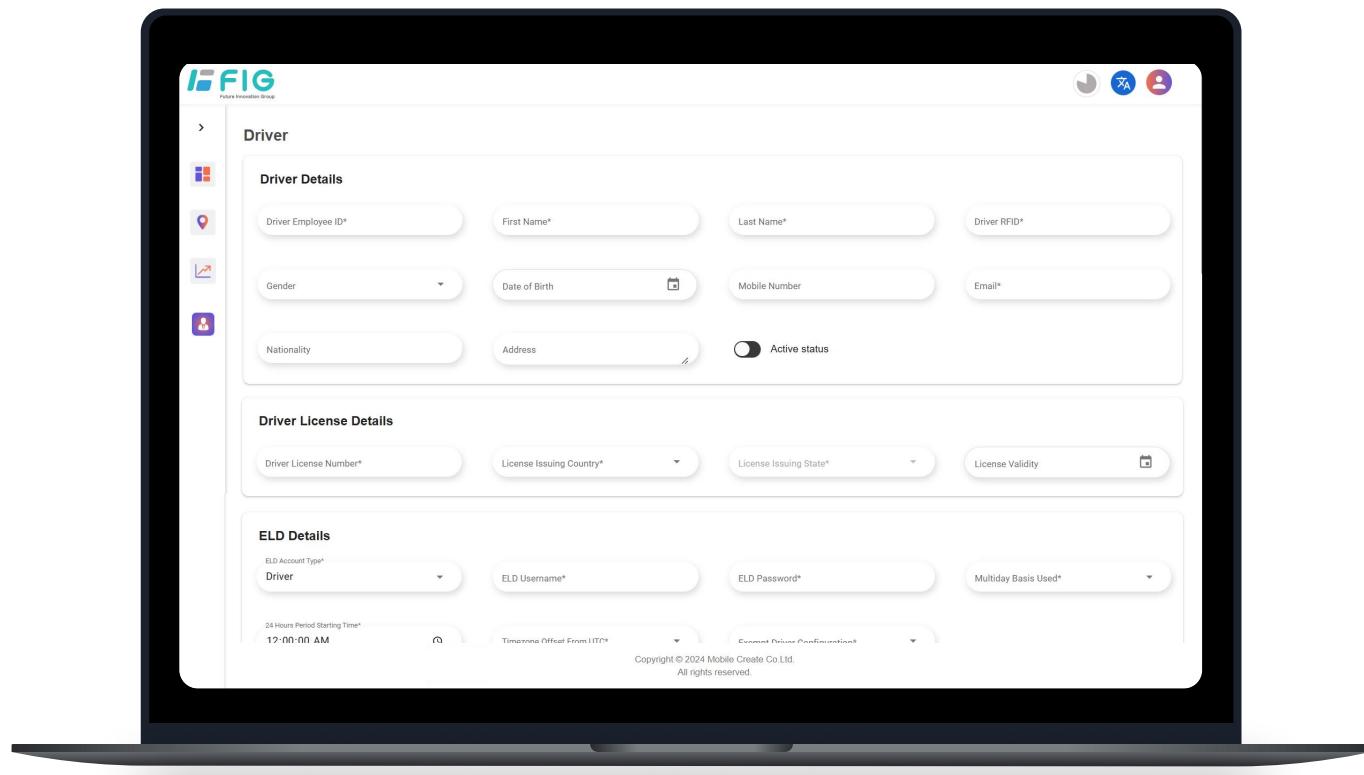

- Cancel button to discard changes and return to the Driver List

CANCEL

2.3 Driver Add

The Add Driver Page is used to create and register new drivers in the fleet.

Carrier support personnel can add a new driver by clicking the Add button on the Driver List Page, which redirects them to the Driver Add Page. 

Driver Add Page

- Carrier support personnel must fill or give the details in the form like **Personal Details, License Details, ELD Details, and Hours of Service (HOS) Details**.
- Once all fields are completed, clicking the **Add** button saves the driver to the system, and the new driver will appear in the **Driver List Page**

 ADD

- Cancel button to discard changes and return to the Driver List

 CANCEL

2.3 Driver Delete

Carrier support personnel can delete a specific driver, or multiple drivers at once if necessary, By selecting the checkbox next to the respective drivers in the table.

Multiple DVIR Record Selected

- After selecting the desired drivers, they can click the **Delete** button, located at the top of the DVIR List Page, to remove them from the system.

1.2 Vehicle Add Page

- To add a new vehicle, the carrier support person clicks the "**Add**" button at the top of the Vehicle List page. 
- This action redirects them to the **Add Vehicle Form**, which contains essential fields to register a vehicle in the system.

Vehicle Add Page

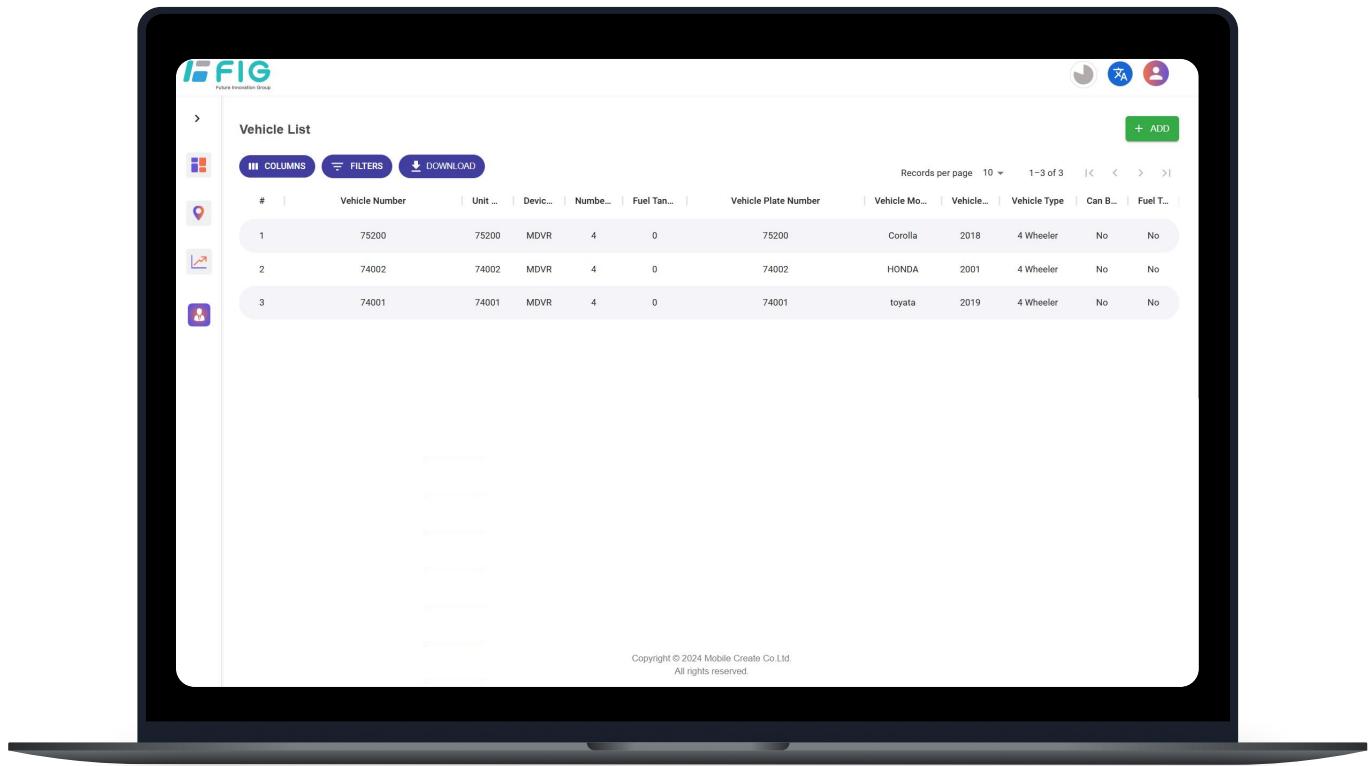

- To create a new vehicle, carrier support personnel must fill out the **Add Vehicle Form**, which requires the following mandatory details: a unique **Vehicle Number**, the official **Vehicle Plate Number**, the **Vehicle Model** and **Vehicle Make**, the **Vehicle Type** (e.g., truck or van), the **CMV Power Unit Number** in accordance with Commercial Motor Vehicle standards, and the **CMV VIN**, which is the unique Vehicle Identification Number. Accurate entry of these fields ensures proper registration and compliance within the system.

1. Vehicle

The Vehicle Add Module allows carrier support personnel to efficiently manage and register new vehicles within the system.

1.1 Vehicle List Page

Upon accessing the Vehicle Add Module, carrier support personnel will be presented with the Vehicle List Page. This page displays a table of all registered vehicles, providing a comprehensive overview of the fleet.

Vehicle List Page

- The **Vehicle List Page** serves as the main dashboard for carrier support personnel to access and view all registered vehicles within the fleet.
- A table format displays a summary of each registered vehicle, including details such as vehicle number, plate number, and model.
